Scene Controller - DT23 - Battery

Broadcasts scene control messages to linked luminaires without the need for a mains connection.

Product Features

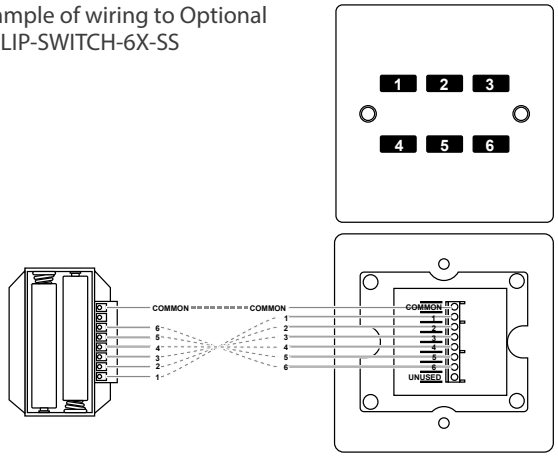

- Communicates directly with luminaires.
- Programmed using tablet application.
- Can be used in conjunction with push to make retractive switches (not included).
- 2 x AAA batteries required. The batteries will last for more than 5 years with up to 50 activations per day.
- Device will report it's battery status to the cloud, generating email alerts before batteries need changing.

Installation

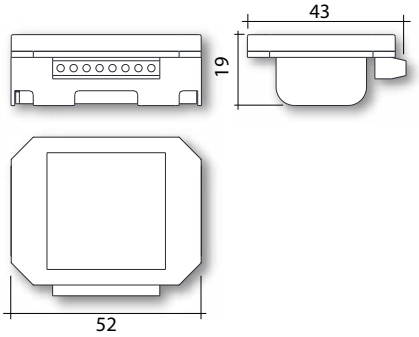

For optimum signal transmission ensure installation with sticker face plate facing out and not fully enclosed in a metal housing.

Example of wiring to Optional LC-LIP-SWITCH-6X-SS
